

is this THE END?

We hope that you will have found, in this book, some of the answers you need to help you to deliver 'Design and Technology' in your classroom.

The chances are, however, that you will have discovered many new questions! If you have any queries, if there is any aspect of primary school D&T that you would like to discuss, then please contact us.

Rude Mechanicals offers a wide range of support including teacher training and workshops for children. To see what is available, we suggest that you visit our website at www.mechanicals.co.uk

Best wishes

Len & Dick
